SUMMARY

Engineer who sells door to door. I built the lead-to-close engine behind Queso Ventures and used it to win dozens of paying clients without losing one.

SKILLS

Languages & Frameworks: TypeScript, Python, SQL, Next.js, React, Node.js, FastAPI
Infrastructure & Data: PostgreSQL, Supabase, Redis, Vercel, Cloudflare Workers, AWS S3, Docker
AI & APIs: OpenAI, Anthropic Claude, multi-agent systems, ElevenLabs, Stripe, Plaid, Salesforce API, Google APIs

EXPERIENCE

Queso Ventures — Founder
Jan 2026 – Present

- **Sales:** ~8% close rate on cold, in-person pitches; cut the sales cycle from a week to same-day.
- **Pricing:** raised new-client pricing 5x, selling AI-search visibility to owners who'd never heard of it.
- **Prospecting:** built lead scoring and AI website mockups, shown on an iPad and used in every closed deal.
- **Automation:** everything after the close runs itself: onboarding, billing, collections, reminders, and support.
- **Land & Expand:** won local SMBs with websites and SEO, then sold them SaaS built from their pain points.

Fordra — Co-Founder
May 2026 – Present

- **Growth:** first paying lenders came from my Lever network; now growing via industry leaders and outbound.
- **Product:** lead AI insurance verification that lenders run inside their own Salesforce, every day.

Lazo — Co-Founder & CTO
Sep 2025 – Jan 2026

- **Growth:** built a WhatsApp AI tutor for 120 learners; set plan tiers and cut 8 languages to 2 from usage.

Lever — Co-Founder & CTO
Apr 2025 – Sep 2025

- **Fundraising:** raised a $250K pre-seed round for a Bitcoin lending platform.
- **Pivot:** moved to logistics factoring; cut carrier verification from days to 1 business day.

MARA Digital Holdings — Lead Software Engineer
Feb 2024 – Apr 2025

- **Leadership:** led 7 engineers and shipped 6 cross-chain fintech apps for a public company.
- **Revenue:** full-stack on Slipstream, a Bitcoin transaction accelerator: $500K+ in its first 4–6 weeks.
- **Tokenization:** led development of Avant, a real-world-asset platform holding $2.2M+.

Freelance — Software Engineer
Aug 2019 – Jun 2023

- **Clients:** 30+ paying, from online universities to local SMBs and biomedical software; Queso's foundation.

EDUCATION

University of Houston | B.S. Computer Science, Minor in Mathematics — May 2023
